

Judith Usall i Rodié is the Coordinator of schizophrenia and other severe mental disorders group in the Research and Development Unit of the Parc Sanitari Sant Joan de Déu. Coordinator of the Working Group for Research in Women and Mental Health (GTRDSM) in the Catalan Psychiatry Association. Master in Women's studies.

The main areas of research in the field of women's mental health are:

- The influence of gender in psychotic and affective disorders.
- Sex based psychopharmacology (especially the influence of estrogen in schizophrenia).
